

PINKI MEENA

JAVA DEVELOPER

9009679126 | pinkimeena52913@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Java Developer with 2 years of experience designing and building scalable web applications using Java, Spring Boot, Hibernate, and modern frontend frameworks such as React.js and Angular. Skilled in developing RESTful APIs, optimizing relational databases, and implementing secure JWT-based authentication. Experienced in direct client communication for requirement gathering and status reporting, with working knowledge of AWS and Docker for cloud-native deployment in Agile/Scrum environments.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript

Backend: Spring Boot, Spring Security, Hibernate, Node.js, Express.js, RESTful APIs

Frontend: React.js, Angular, Next.js, HTML5, SCSS, Tailwind CSS, Angular Material

Databases: MySQL, PostgreSQL, MongoDB, Spring Data JPA

Cloud & DevOps: Maven, Git, GitHub, AWS (Basic), Docker (Basic)

Testing & Tools: JUnit 5, Mockito, Postman, Swagger/OpenAPI

Methodologies: Microservices Architecture, Agile, Scrum, JWT Authentication, RBAC, Client Handling

PROFESSIONAL EXPERIENCE

Software Developer — Singaji Software Solutions

2024 – Present

- Built and deployed scalable web applications using Java, Spring Boot, and React/Angular, translating business requirements into high-performance, production-ready features.
- Designed RESTful APIs and microservices with Spring Boot and Hibernate, streamlining data flow and reducing latency across multiple enterprise projects.
- Communicated directly with clients for requirement gathering, progress updates, and UAT feedback, keeping delivery aligned with business expectations.
- Implemented security protocols, including JWT authentication, Spring Security, and role-based access control (RBAC), to protect sensitive user data.
- Tuned database schemas across MySQL and PostgreSQL using Spring Data JPA, improving query efficiency, cascading operations, and system reliability.
- Collaborated with cross-functional teams in Agile/Scrum environments, contributing across the full SDLC from requirement gathering to deployment.

KEY PROJECTS

Java Blog Application — Backend RESTful Web Service

Java 17, Spring Boot 3.5, Spring Security, JWT, Spring Data JPA, MySQL, JUnit 5, Mockito

- Designed and built a scalable RESTful backend using Java 17 and Spring Boot, implementing a clean layered architecture (Controller-Service-Repository) to manage users, posts, and comments.
- Implemented stateless authentication with JWT and Spring Security, using BCrypt password hashing and role-based access control (RBAC) for Admin and User authorization.
- Configured Spring Data JPA and Hibernate ORM with MySQL, enabling efficient queries, cascading operations, server-side pagination, and Jakarta Bean Validation.
- Integrated Swagger UI / OpenAPI 3 for interactive API documentation and achieved high code reliability with JUnit 5, Mockito, and MockMvc test suites.
- Built a centralized global exception handler (@RestControllerAdvice) for standardized JSON error responses.

Bconnect — Lighting Product Platform

React.js, Spring Boot, Tailwind CSS, REST APIs, MySQL

- Architected a dynamic web platform for an Indo-Italian enterprise to support real-time product management.
- Connected a Spring Boot backend with MySQL, enabling administrators to manage product lines, dynamic page layouts, and technical datasheets.
- Implemented API-driven dynamic routing in React.js to streamline rendering across category views.

CyberStash — Cyber Defense Portal (CDP)

Angular, Spring Boot, TypeScript, REST APIs, RxJS, HTML5, SCSS

- Developed a Cyber Defense Portal for enterprise threat detection and network environment management.
- Integrated third-party APIs through a Spring Boot backend to automate IP blocking and threat mitigation.
- Built interactive security dashboards in Angular (RxJS) to display real-time threat telemetry, communicating securely with backend services.

Digital Notice Board — Smart Notice Management System

React.js, Spring Boot, TypeScript, HTML5, SCSS, REST APIs

- Created a web application for educational institutions to digitize announcement workflows.
- Built customizable preview templates and themes in React.js for rapid visual notice scheduling.
- Delivered a responsive admin interface backed by Spring Boot, supporting real-time broadcast synchronization across institutional displays.

Hashproma — Project Management E-Learning Platform

React.js, Node.js, Tailwind CSS, REST APIs, MySQL

- Engineered a full-stack e-learning platform featuring online courses, live schedules, and user management.
- Linked a Node.js backend with MySQL to manage dynamic content for training resources.
- Built a responsive frontend UI using React.js and Tailwind CSS for seamless cross-device navigation.

NLL-AI-MVP — AI-Powered Lead Intake & Qualification Platform

Python (FastAPI), AWS Bedrock, Next.js, PostgreSQL, AWS SQS

- Architected a high-throughput asynchronous backend using FastAPI and AWS SQS to process Twilio SMS webhooks.
- Built an LLM pipeline via AWS Bedrock for automated fact extraction and deterministic safety gating.
- Developed an RBAC dashboard, ensured regional data sovereignty, and synchronized leads with HubSpot CRM.

Setu — AgriTech Backend Platform

NestJS, Node.js, MongoDB, TypeScript, REST APIs

- Built scalable backend infrastructure connecting farmers with resource management tools.
- Designed a modular NestJS architecture with TypeScript to map complex relational data structures in MongoDB.

CORE COMPETENCIES

Java Web Development • Spring Boot & Microservices • RESTful API Architecture • Database Design (Hibernate/JPA) • Frontend Integration (React & Angular) • Cloud Basics (AWS & Docker) • Secure Authentication (JWT & Spring Security) • Client Handling & Requirement Gathering • Test-Driven Development (JUnit/Mockito) • Agile Methodologies • Performance Optimization
